TYPES OF VINYL FLOORING

Luxury Vinyl is the perfect flooring choice for a busy family with kids, pets, and life happenings. Vinyl is WaterProof, KidProof, and PetProof with durability, easy-maintenance, and scratch or scuff resistant protection.

SPC LUXURY VINYL

SPC Vinyl construction has an incredible firm, solid core creating the ultimate stability and durability. The core is made of stone polymer composite making this flooring durable and maintaining its form even over uneven subfloors. This vinyl comes with a pad attached. Majority of the installation methods are click and lock.

WPC LUXURY VINYL

WPC Vinyl stands for wood-plastic composite. It is slightly softer and more comfortable to walk on than SPC. This vinyl comes with a pad attached. Majority of the installation methods are click and lock.

LUXURY VINYL OVERVIEW AND ADVANTAGES

Its rugged versatility and waterproof characteristics account for its widespread use in kitchens, bathrooms, family rooms, dens, playrooms, finished basements and workshops. Vinyl stands up to moisture, household traffic, and the active play of children and pets.

Available in high-fashion designs made possible through innovative manufacturing techniques, today's vinyl combines a luxurious appearance and cozy, foot-cushioning resilience to make a truly elegant - and comfortable - floor covering.

It's vinyl like you've never seen it before! The look of vinyl has changed drastically in the last few years, making your design possibilities limitless. Along with traditional and contemporary fashion colors and geometric patterns, vinyl is now available in natural wood and stone looks. The remarkable variety of decorator designs makes it more practical than ever for your home's formal as well as casual settings.

Remarkably realistic, vinyl flooring that reflects the timeless beauty of wood and stone retains all the other traditional advantages of vinyl, including low maintenance and affordability.
